

Movement, Sensory, Communication, Social Skills and Academics

For your Special Needs child

What:

FUN 45 minute to 2 hour classes (by age) tailored for **special needs** children from **newborn to age 10 years old** (but appropriate for typical children as well). Sessions focus on social skills and motor skill building such as turn-taking, greeting, making choices, following directions as well as academics. We use organized movement in order to integrate the brain and the body. We get non verbal kids talking, help children learn to self regulate behavior, improve muscle tone and so much more!

We have drop in programs; parent / child classes, sign language classes, gym time as well as drop off programs; a unique preschool program, specialized tutoring / homework help, a monthly Parents Night Out and we offer FREE Parent (Info and Tools) Sessions with topics such as Behavior as communication, the brain and learning, proper nutrition, positive parenting, and child development.

Becky Blake, Neurodevelopmental Specialist, has extensive experience with children on the Autism Spectrum as well as expertise in other neurological differences. She has been working with children in public and private schools for over 15 years and has degrees in Child Development, Early Childhood and Special Education.

When:

10 session, 1 hour / 1 day a week, August 11th to October 19th , 2008 or

10 sessions, 2 hours / 4 days a week for drop off preschool program (get some errands done or take a break) or

10 sessions, 1.25 hours / up to 4 days a week for Specialized Tutoring / Homework Help / Academic Catch up.

Check schedule for class times at www.BabyPower.com/Everett for the Early Fall Schedule

Where:

Baby Power Forever Kids, South Snohomish County, 607 Everett Mall Way, #10, Everett, WA 98208

Cost:
